PROFESSIONAL SUMMARY

Backend developer who builds REST APIs with Python, Django, and Django REST Framework. Built a deployed Django web app, a role-based delivery platform with OTP verification, and a Python scraper for NEPSE data. Comfortable with Git, MySQL, MVC structure, and clean object-oriented code. Learns quickly, debugs independently, and is looking for a backend internship or junior role where I can ship real features and grow with a team.

TECHNICAL SKILLS

- **Backend:** Python, Django, Django REST Framework, REST API design, OOP, MVC, authentication, role-based access control
- **Databases:** SQL, MySQL, MongoDB, schema design
- **Data Extraction:** Web scraping with Python
- **Tools & Practices:** Git, GitHub, Postman, Linux, VS Code, SDLC principles, clean and readable code
- **Web Basics:** HTML, CSS

PROJECTS

Piuney.com – Liquor Delivery Platform *In development*

- Building a two-sided marketplace with separate user and dealer sides using Django REST Framework, with role-based access and authentication.
- Designing the order flow: the order notifies the nearest available dealer, who accepts and fulfills the delivery.
- Adding OTP verification so an order is marked complete only after the customer confirms delivery.
- Structuring the backend into modular components that follow MVC principles, ready for scalable order matching.

Bloggy – Blog Web Application Live demo | Source

- Built an object-oriented Django app with user authentication and full CRUD, using Django's ORM and a SQL database.
- Applied OOP and MVC principles to keep the code clean, readable, and easy to maintain.
- Created a responsive interface and set up the Django admin panel for content management.
- Deployed the app online with a public live demo and the full source code on GitHub.

NEPSE Scraper Source

- Wrote a Python scraper that extracts data from NEPSE, the Nepal Stock Exchange, a live real-world data source.
- Applied web scraping and data extraction techniques, with the code version-controlled on GitHub.

STRENGTHS

- Problem-solving and debugging, built through independent, self-directed projects.
- Clean, readable code and everyday Git and GitHub workflows.
- Fast learner, clear communicator, and dependable in remote work.

EDUCATION

New Horizon College – Tilottama Jan 2023

- +2 Science (Computer Science) — GPA: 2.98

Horizon English Boarding Higher Secondary School Jan 2021

- SEE — GPA: 3.6
